

Anderson 700 Amp Connectors

Anderson 700 Amp Connectors

The rugged SBE 700 connector is designed for high-current high-speed battery charging, making it ideal for fast charge applications. This genderless connector is hot-pluggable and contains space for up to 10 individual auxiliary signal contacts for communication and signal requirements. Rugged and reliable, the SBE700 is capable of 10,000 no load mating cycles.

This self-aligning connector features high performance copper contacts and is engineered for use with standard 4/0 cables. A manual release mechanism is available as an accessory.

The SBE 700 connector offers a fingerproof design for operator safety and an integrated cable clamp that provides security against cable insulator creep and excessive cable strain under adverse conditions.

Connector specific keying can be ordered to ensure only matching connectors can be mated.
