

Tajimi TC1108 Waterproof

Tajimi TC1108(Submersible to 30 metres)

TC1108 Waterproof Connector Data-sheet 764.09 Kb

Overview:

1108 series connectors are built compact and the tight waterproofing mechanism allows the model to be at a depth 30 metres under water. This model is also ideal for application where units are exposed to extreme weather or high humidity either inside or outside.

Features:

- Economical and highly reliable.
- Circular connectors designed for the harshest conditions
- Shells of Nickel plated Brass
- Waterproof to 30 metres in depth
- Cable gland seal on rear of in line types.
- Will operate from -25°C to +85°C
- 2 – 37 contact versions are available
- Caps are available to provide IP68 protection when capped
- Hermetically sealed version of the receptacle is also available
- Their size and the waterproofing mechanism make them suitable for a wide variety of equipment operating in high humidity areas.
